About Ebsotech

Founded in 2003, Ebsotech was formed to create a new level of software tools previously unavailable to the IT-industry for multi-platform high-performance software development. As a part of this mission company has released Ebsotech IX™ product-line offering high productivity C/C++ development and high-performance state-of-the-art results. As supplementary, Ebsotech offers support services and technology consulting services in co-operation with various technology partners.

Introduction

Ebsotech IX™ SDK is a framework for rapid development of platform-independent software. Its innovative Operating System Abstraction technology effectively encapsulates 32-/64-bit, processor architecture and byte order differences, providing a common interface for all the major operating systems.

General Information

This document contains information about Ebsotech IX™ SDK Release 2.0: what new features are included in this release, and how the documentation has changed since the previous release.

The major changes in the Release 2.0 of Ebsotech IX™ SDK include the following:

- ▶ Ebsotech IX™ Localizer translation tool on a separate disk
- ▶ Support for the Borland® C++ Compiler on Microsoft® Windows® platforms
- ▶ Updated documentation

Package Information

This chapter describes which parts of the IX SDK release package have changed since the previous release.

Note that all the included files are not listed one by one, only the major changes are described below.

Ebsotech IX™ SDK

New Modules

Directory `libbr132` containing libraries for Borland C++ Compiler has been added to the Microsoft Windows installation. The installer allows the Windows user to choose whether to install Microsoft or Borland libraries, or both.

Changed Modules

The following IX SDK libraries have been extended:

<i>Module</i>	<i>Description</i>
DXACFG	DXA Configuration Management Library
DXASYS	DXA System Routines Library
DXAGEN	DXA Generic Library
DXACOLL	DXA Collections Library
DXATool	DXA Tool Library
DXAEXP	DXA Definition File to Export File Conversion Utility

Changed Documents

The following documents have been updated:

Developer's Guide

- ▶ Chapter *Globalization Support* has been updated, providing programmers valuable information on Ebsotech IX™ SDK localization and globalization support

Reference Manual

- ▶ The documentation for the DXAGEN library has been expanded

Ebsotech IX™ Localizer

New Modules

This release of Ebsotech IX™ SDK contains the first release of Ebsotech IX™ Localizer. It comes accompanied by a comprehensive User's Guide instructing in using the Localizer translation tool.

Ebsotech IXMLp™

New Modules

New high-performance software modules have been added to fully implement the XML functionality specifications.
